Izvor: *OECD Health Data 2009*.

Očekuje se dalje pogoršanje demografske situacije kroz smanjenje broja dece, a produženje životnog veka (Grafikon 1).

Grafikon 1. Očekivane demografske promene

Izvor: Skipper, Kwon (2007: 154).

Posledica takvog demografskog trenda je sve veće učešće populacije sa i preko 65 godina u ukupnoj populaciji. Prognoza je da će njihovo učešće u 2050-oj godini biti 27% u razvijenim zemljama, i 14% u nerazvijenim i zemljama u razvoju (Grafikon 2).

Figure 13: Life expectancy at birth against per capita total health expenditure

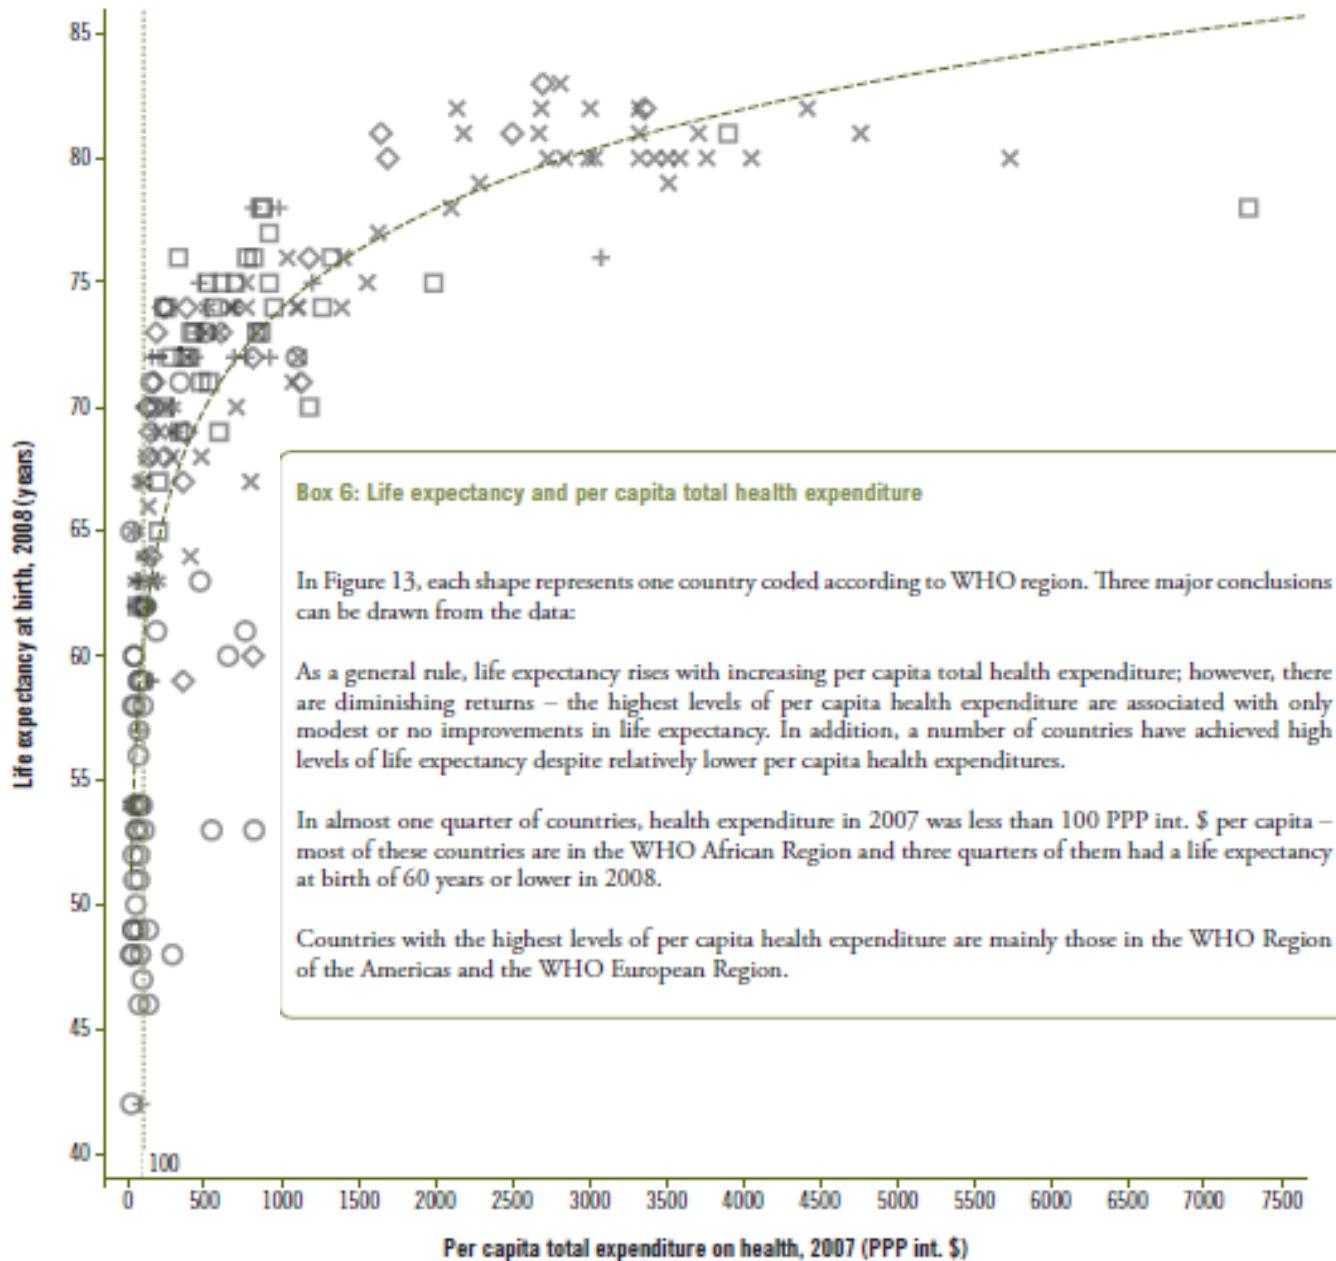

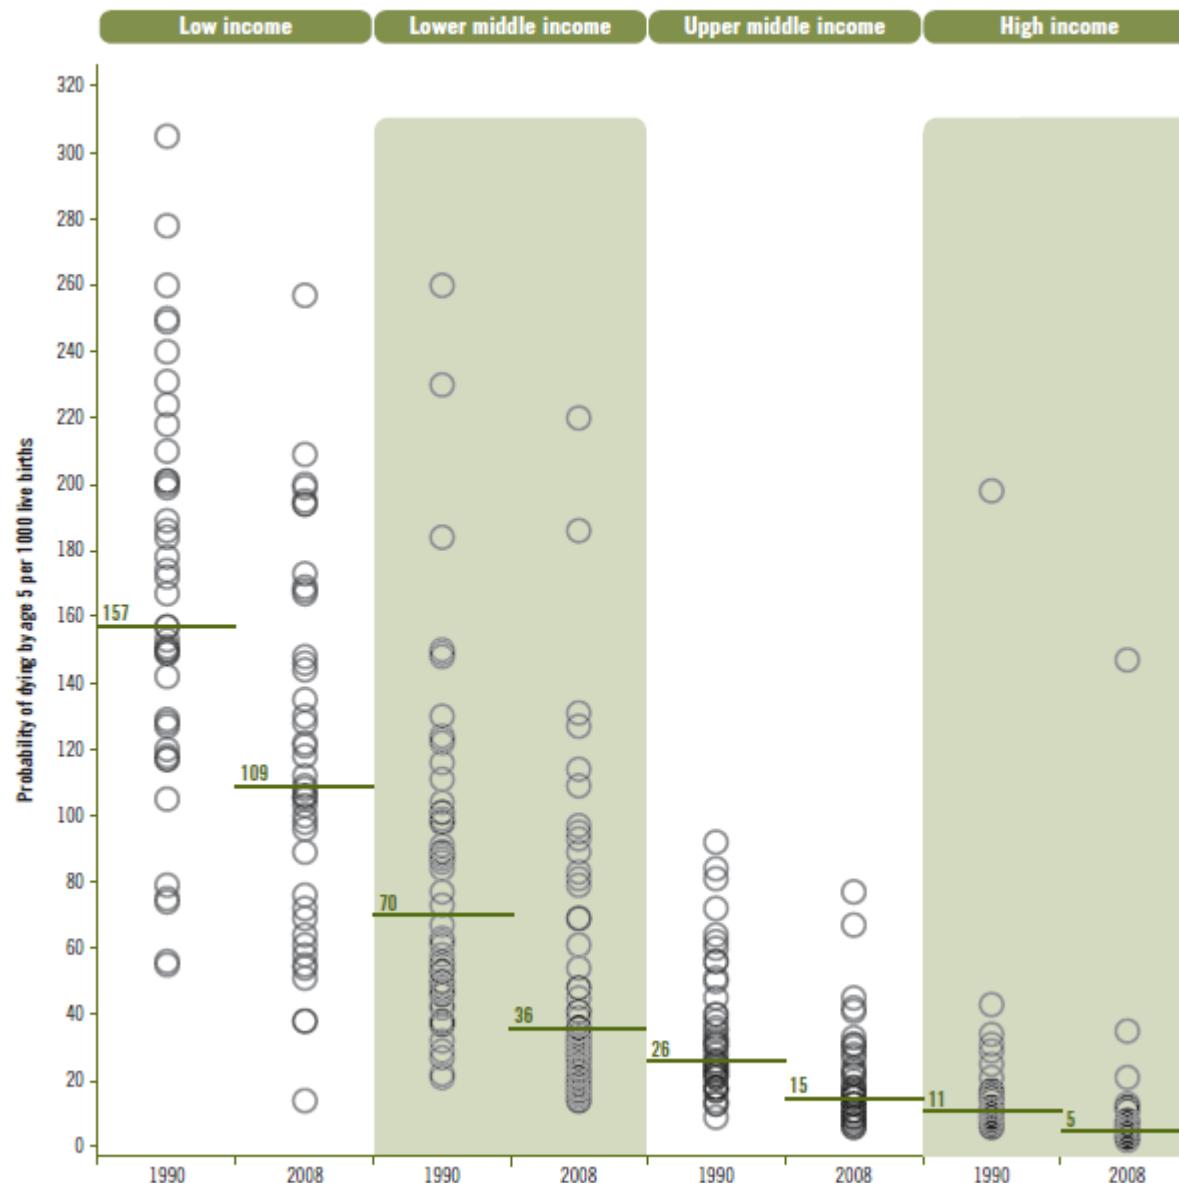

Figure 8: Mortality rate in children under 5 years old by country-income group – 1990 and 2008

Note: Solid horizontal lines indicate the median.

1. Mortality and burden of disease

Member State	Life expectancy at birth ^a (years)									Healthy life expectancy (HALE) at birth ^b (years)			Neonatal mortality rate ^c (per 1000 live births)
